Ferndale Police Department

Oakland County, Michigan

Published The agency answered 26-669 on Sep 30, 2026 (the day the request counted as received, no extension): no responsive records, by the agency's statement, at no charge. It answered 26-668 on Oct 15, 2026 (business day 11, after extending its time to Oct 21, 2026): granted in part, denied in part, at no charge. The records and our analysis are published. The agency's reply, when one arrives, is under Right of reply.

> **How to read this page**
>
> RECORD The statement repeats what a document or an agency's data export says. The source is linked from the page. Documents we publish are listed on the Records and Letters pages.
>
> GAP The agency did not produce something the request asked for. We note what the agency said about it, if anything.
>
> QUESTION The records leave a point unanswered. We send each question to the agency in writing: with the draft of its records and our analysis, or in a later letter when the question is added afterward. Its answer is published on the page.
>
> ANALYSIS This is our reading of the records, labeled so it is never mistaken for a record.
>
> REPORTED The statement comes from a named, linked source outside our document library, such as a news report, a published council agenda or another project's data. Where the agency's own records later arrive, they replace it.
>
> Each agency gets a draft of its records and our analysis before they are published, and its reply is published in full (Methods).

The Department's 90-day report counts 3,512,494 plates read and 1,563 hot-list alerts between June 1 and August 31, 2024, with 16 cameras operating. 29 interagency agreements, signed for partner agencies between July 2024 and July 2025, share the data each agency collects through Flock with the other at no cost. The City announced the end of its use of Flock on November 13, 2025, as reported.

STATUS

End of use announced November 13, 2025, as reported

CAMERAS

16 cameras in the Department's 2024 report

RETENTION

30 days

ANNUAL COST

$48,100 the first year, then $42,500 a year

Timeline

Date	Event	Source
Mar 2023	The Council approves the purchase of the system, as the Department's 90-day report states; no agenda, memo, minutes or vote is in the release.	90-day report
Mar 30, 2023	The City Manager signs two Flock order forms, one for 8 Falcon cameras and one for 16, each with a 24-month initial term and a 60-day pilot period.	16-camera form, 8-camera form
Jun 8, 2023	The Department's Patrol Commander, a Captain, writes to the Michigan Department of Transportation requesting to install license plate readers through Flock Safety.	Letter
Jun 29, 2023	Article 93, Automated License Plate Reader, is issued and takes effect, signed by the Chief of Police.	Article 93
Sep 7, 2023	Flock's first invoice: 16 Falcon cameras, implementation and Advanced Search, $48,100 less a credit of $5,000.	Invoices
Sep 11, 2023	Flock's $10,000 permit bond is dated, for right-of-way permit PRW2023-0027, which names Flock Safety as applicant and covers 10 solar-powered license plate readers in City right of way.	Permit

Date	Event	Source
Feb to May 2024	Flock installs the cameras, by the report: installation begins in February 2024 and the final camera is installed in May 2024.	90-day report
Feb 15, 2024	Article 93 is reviewed, by its own header.	Article 93
Jun 1 to Aug 31, 2024	The period the Department's 90-day report covers, with all 16 cameras operational.	90-day report
Jul 3, 2024	The earliest-dated of the interagency agreements are signed for partner agencies.	Earliest agreement
Sep 2024	The 90-day report, presented by the Chief of Police: camera locations, data collected, an organizational audit, notable successes and a conclusion, with Article 93 as its appendix.	90-day report
Oct 14, 2024	Flock's second invoice, for year two of the 24-month term: $42,500 less a credit of $5,000.	Invoices
May 12, 2025	The Deputy Chief of Police signs, through DocuSign, a Flock pilot agreement for a 45-day pilot of the FreeForm add-on at no charge; Flock's block carries no signature.	Pilot agreement, DocuSign certificate
Jul 22, 2025	The latest-dated of the interagency agreements is signed for a partner agency.	Latest agreement
Nov 13, 2025	The City announces the end of its use of Flock, as reported.	Oakland County Times, Nov 23, 2025
Sep 13, 2026	Flock's transparency page for the Department is headed "Ferndale MI PD [INACTIVE]" on the archive's copy dated by the page itself.	Transparency page, Archive

What the program is

> RECORD For item 1 of Request A the City produced two Flock order forms signed for the City by the City Manager on March 30, 2023, one for 8 Falcon cameras and one for 16. The 16-camera form prices the first year at $48,100, $42,500 a year after that, and $90,600 over a 24-month initial term. The 8-camera form prices $25,300 the first year and $47,800 in total. Both forms provide for a 60-day pilot period at the start of the initial term with an option to cancel the contract at no cost, and renew for successive terms unless either party gives notice of non-renewal at least thirty days before the end of the current term. On both, Flock's signature, name, title and date lines are blank. The terms attached to each form provide that Flock deletes footage on a rolling thirty-day basis and that termination for convenience by the agency carries a removal fee of $500 for each Flock hardware unit.

RECORD Two invoices were produced. INV-21805, dated September 7, 2023, bills 16 Falcon cameras, the implementation fee for 16 and Advanced Search, $48,100 in all, less a credit of $5,000, $43,100 due. INV-49630, dated October 14, 2024, for year two, bills 16 cameras and Advanced Search, $42,500, less a credit of $5,000, $37,500 due. No record of a payment, and no invoice for any period after the 2024-2025 year, is in the release.

ANALYSIS The two invoices' subtotals add to $90,600, the total contract amount on the 16-camera form, and their balances due add to $80,600 after the two credits. The invoices show amounts billed and do not show payments.

QUESTION Item 1 asked for every agreement with Flock, with amendments and renewals, and all invoices. The two order forms produced carry the City Manager's signature of March 30, 2023 and no signature for Flock, and the invoices bill 16 cameras. Does the City hold a copy of either form executed by Flock, and which form governed the account? What are the two credits of $5,000? Did the agreement renew after its 24-month term or end by a notice of non-renewal or termination, and does the City hold that notice, Flock's acknowledgment, or any invoice issued after October 2024?

Added or revised November 10, 2026, after the agency's review.

RECORD The Department's 90-day report says: "The City Council approved the purchase of the Flock Safety Automated License Plate Reader (ALPR) System in March 2023." Its conclusion says: "The Ferndale Police Department initially received funding for eight Flock Safety Automated License Plate Reader cameras. Through donations from private and corporate businesses, the Department acquired an additional seven cameras, bringing the total to 15."

GAP No purchase order, bid record, budget record, grant or donation record, agenda item, staff memo, minutes or vote on the purchase, the 2025 pilot or any renewal is in the release. The City's closing message says: "Documents such as contracts and pricing, as well as purchase orders and additional budgeting information will need to be obtained through a FOIA Request with City Hall."

QUESTION What records document the Council's approval of March 2023 and the funding of eight cameras and the donation of seven that the report describes?

RECORD The Department's report, headed 90-Day Flock Report 2024 and dated September 2024 on its cover, says: "In February 2024, Flock began installing cameras around the city (see camera map in Appendix A). The final camera was installed in May 2024." It lists 16 numbered camera positions, each named by direction of travel and cross streets, with a map; its note under the map says the cameras were placed along the City's perimeter to capture vehicles entering the city. The City also produced a street map of the City with 16 numbered camera positions and no date. The report's conclusion counts 15 cameras, 8 funded and 7 donated, and says: "the data in this report found that Camera 10 was not effective, and it has since been removed." The City's right-of-way permit PRW2023-0027, naming Flock Safety as applicant, covers the installation of 10 solar-powered license plate readers within City right of way at no fee. No device list was produced.

QUESTION Item 5 asked for the Flock device list export or an equivalent list, with each camera's location, device type and install date, and any installation, relocation or decommission record. The report and the map give 16 positions; the report's conclusion counts 15 cameras and says Camera 10 has been removed; the City's permit covers 10 readers in City right of way. Does the City hold a device list, a

record of Camera 10's removal or of any relocation, the Deployment Plan the agreement's terms describe, or a permit from the Michigan Department of Transportation for the positions in state right of way? Are any of the cameras still in place, and if they have been taken down, when and by whom?

RECORD For item 3 the City produced Article 93, Automated License Plate Reader, dated issued and effective June 29, 2023, reviewed February 15, 2024, signed by the Chief of Police, Dennis M. Emmi; the same policy is Appendix A of the 90-day report. It names the Detective Bureau Commander as the Department's ALPR Administrator; provides that "An ALPR shall only be used for official law enforcement business." and that "reasonable suspicion or probable cause are not required before using the ALPR"; states that "It is a violation of this policy to use the ALPR system for enforcement of immigration laws." and bars use "for traffic enforcement, or the enforcement of civil infractions and civil judgements"; requires that "Every ALPR Detection Browsing Inquiry must be documented by the associated Ferndale Police Department incident report and the reason for the inquiry."; requires a supervisor's approval of each hot-list entry, which is to carry the entering employee's name, the related case number and a short synopsis; and provides that "All investigative inquiries are logged by user and available for auditing and review by the Ferndale Police Department." The report says: "The Flock software requires that a user log in, provide a case number, and a synopsis of the crime."

QUESTION The policy produced is dated issued June 29, 2023 and reviewed February 15, 2024; the report says the policy was published in March 2023 and reviewed in March 2024. Is there a version dated before June 29, 2023, or a review or revision after February 15, 2024? Item 3 also asked for standard operating procedures, hot-list criteria, an audit policy and any list of approved search reasons; does the Department hold any of these apart from Article 93?

RECORD The City produced a Flock pilot agreement with a pilot order form for the "Flock Safety Platform - FreeForm Add-On", which the form describes as a software add-on that "adds the ability for users to search using plain language across LPR images and video footage". The form sets a pilot term of 45 days, a retention period of 0 days and a contract total of $0. The Deputy Chief of Police signed it through DocuSign on May 12, 2025; Flock's block carries a typed name and no signature, title or date. The DocuSign certificate produced with it counts 6 document pages, and 4 were produced.

QUESTION Did Flock execute the pilot agreement of May 12, 2025, did the 45-day FreeForm pilot run and over what dates, and what are the pages of the envelope beyond the 4 produced? Was the pilot approved by the City Council or the City Manager, or recorded in an agenda or in minutes? What did the retention period of 0 days on the pilot order form mean for that pilot?

RECORD Article 93, section 8.2, provides: "The ALPR's vendor will store the data and ensure proper maintenance and security of the data stored in their data towers. Recordings not relevant to an active investigation, a formal complaint against this agency, or an officer of this agency must be kept the date it was created plus thirty days." with a footnote to the State's General Retention Schedule #11 for local law enforcement. The 2023 order forms' terms provide that Flock deletes footage on a rolling thirty-day basis. The City's closing message says: "Department retention policy was in compliance with Michigan State standards". Item 6 also asked for any settings record of the retention period in the Flock account and any correspondence with Flock about setting or changing it; none is in the release, and the message does not say whether any exists.

RECORD Item 6 asked for the address of any Flock transparency portal the Department publishes. Flock's transparency page for the Department, at transparency.flocksafety.com/ferndale-mi-pd (https://transparency.flocksafety.com/ferndale-mi-pd), is headed "Ferndale MI PD [INACTIVE]" on the copy dated September 13, 2026 in a public archive kept by Cantica Systems (https://github.com/Cantica-Systems/mi-flock-transparency), and our own snapshot of September 10, 2026 records the page as inactive.

QUESTION What retention period was set in the Department's Flock account, and does the City hold a settings record or correspondence with Flock about it, including the Department's own request to Flock?

What it does

RECORD The 90-day report, dated September 2024 on its cover and presented by the Chief of Police, is the one record of the system's use the City produced. For June 1 to August 31, 2024 it reports 3,512,494 license plates read, 1,563 hot-list alerts, 16 alert vehicles stopped by patrol, 17 Ferndale crimes investigated by detectives, 7 cases cleared by arrest and 4 leads generated, with all 16 cameras operational. Its note says: "Hotlist alerts include license plates entered in the National Crime Information (NCIC), Secretary of State (SOS), or Law Enforcement Information network databases."

RECORD The report's organizational audit section includes an investigators audit: "Four investigators searched the Flock Safety system in the 90-day period. All searches were validated as being connected to a criminal case and within policy." It lists the 4 by rank with the number of searches each ran. Our public copy blacks out their names and keeps the ranks and the counts.

RECORD For item 4, data sharing, the City produced 29 interagency agreements on one template, each headed "INTERAGENCY AGREEMENT BETWEEN THE CITY OF FERNDALE POLICE DEPARTMENT AND" a named partner "FOR INFORMATION EXCHANGE AND USE", with police departments, sheriff's offices and public safety departments in Michigan, dated by the partner's signature from July 3, 2024 to July 22, 2025: 16 in 2024 and 13 in 2025. Each recites that the Department receives license-plate extract files from the State Police for use through a license plate reader and that both agencies have a Criminal Justice User Agreement and License Plate Reader Supplement on file with the State Police, and provides: "Data collected by the Agencies through Flock Systems shall be shared to the Agencies." at no cost; that the agencies "agree to provide valid investigative information (Incident Report Number) within the FLOCK system"; that each is responsible for the acts of its own personnel; that the agencies have an obligation to report instances of misuse to the State Police; and, on all but one copy, that either agency may terminate on thirty days' written notice, or at once on finding that the other has violated the agreement. On every copy produced the partner's signature block is filled and the signature and date lines for the City of Ferndale Police Department are blank.

RECORD The City also produced 38 files holding other agencies' license plate reader or camera policies, 39 policies in all, one of them inside an agreement file; 4 are policies of agencies in Ohio and one is a standard operating procedure of the Dallas Fusion Center / Real Time Crime Center. Article 93, section 11.1.1.1, provides that a partnering agency "must have a policy regarding ALPR system usage that contains oversight and accountability provisions consistent with this policy or have a signed memorandum of understanding with this department", and section 11.1.1.2: "A list of approved

partnering law enforcement agencies will be documented in the department's electronic files." The report's policy review says: "Over 90 police agency policies have been vetted and approved. While 13 agencies have been rejected for not meeting our standards." The agreements' partner agencies and the agencies whose policies were produced are 66 organizations in all.

GAP Item 4 asked for any agreement, memorandum of understanding or written authorization under which another organization may access the Department's Flock data or the Department another's, naming other agencies, the Flock statewide and nationwide networks, the State Police, fusion centers, federal agencies and private entities, and for any record of the Department's decision to join or leave the Flock statewide or nationwide networks. The release holds the 29 agreements and the policy files. It holds no list of approved partnering agencies of the kind section 11.1.1.2 describes; no record of the policies vetted or the agencies rejected that the report describes; no copy of the Department's Criminal Justice User Agreement and License Plate Reader Supplement that the agreements recite; and no record of the account's sharing settings or of a decision to join or leave Flock's statewide or nationwide networks. The City's message does not mention item 4.

QUESTION Did the Department's Flock account share its cameras through Flock's statewide or nationwide networks, and did any federal agency, fusion center or private entity have access to the Department's data, or the Department to theirs? Is the decision recorded, and does the City hold the account's sharing settings, the list of approved partnering agencies, the records of the policies vetted and the agencies rejected, and the Department's user agreement and supplement with the State Police? Does the City hold copies of the 29 agreements executed for the Department, and who signed them?

RECORD Request 26-669 asked for the system's own exports: the search audit and the network audit from July 1, 2026, the change logs for the same period, and the sharing configuration, the hot-list alert summary and the user list as of the date the export is run. The City's letter of September 30, 2026 restates the request as "FPD FLOCK records from 01 July 2026-Present." and reads: "The City denies the request because the City does not have or maintain the public records requested." It adds that the City is not required to create a document or a compilation, summary or report of information, citing MCL 15.233(4), or a new public record, citing MCL 15.233(5). The certificate it gives is quoted under How the agency answered.

REPORTED The Oakland County Times reported on November 23, 2025 (https://oaklandcounty115.com/2025/11/23/after-ending-use-of-flock-license-plate-cameras-ferndale-council-considering-contract-with-axon/) that "The City of Ferndale recently discontinued use of Flock Safety license plate recording cameras after members of the community shared concerns about how the technology and data were being used." and that "The announcement to end Flock was made Nov. 13." The same report says that at the City Council meeting of September 29, 2025 "the Police Chief presented data from the use of Flock in Ferndale, including info on the placement of cameras, and what crimes were investigated using the technology", and quotes the Chief of Police: "Though the city had concerns with the vendor, the police department was very successful using ALPR technology to solve serious crimes in our community, including murders, attempted murder, robberies, and home invasions."

QUESTION Does the Department's Flock account still exist? If it was closed, when and by whom, and does the City hold Flock's confirmation of the closure or of the deletion of the Department's data? Were any search audit, network audit, sharing or user exports run from the account before then, for the Department's own audits under Article 93 or for the data on the use of Flock presented to the City Council on September 29, 2025, as reported, and does the City hold those files?

Oversight

RECORD Article 93, section 10.0, provides: "It is the responsibility of the Chief of Police or their designee to conduct an annual audit of the ALPR detection browsing inquiries, including an audit sampling of the ALPR system utilization from the previous 12 months" and section 10.1: "The audit shall be documented in an internal report to the Chief of Police. The report shall include any data errors found and any violations of this policy." Section 11 governs the release of ALPR data to other agencies: partnering agencies may be granted access by the Chief or a designee on the conditions quoted above, and a non-sharing agency's request is to name the agency, the requesting employee and the incident, is reviewed by the Chief or a designee, and "shall be documented and retained in the report writing system."

RECORD Item 7 asked for each internal audit memo or report of ALPR use prepared under the Department's ALPR policy, with any list or sample of the searches reviewed; any written finding that a user violated the policy; any memo or report the Department has prepared about searches of its cameras by other organizations; and any periodic usage or performance report Flock has sent since January 1, 2024. The City produced the 90-day report of September 2024, whose organizational audit section holds the policy review and the investigators audit quoted above. Its closing message says: "Any audits would be obtained through City Hall as well."

GAP Article 93 has required an annual audit of browsing inquiries, documented in an internal report to the Chief of Police, since June 29, 2023. No annual audit report for any year, no list or sample of searches reviewed, no finding of a policy violation, no memo or report about other organizations' searches of the Department's cameras and no report from Flock is in the release. The City's message assigns audits to City Hall and does not say whether any exists.

QUESTION Was an annual audit under section 10 of Article 93 conducted for 2024 or for 2025, and where is its report? Has the Department or the City reviewed the searches other organizations ran on the Department's cameras, and does the City hold a log of those searches or a report on them, including the data on the use of Flock presented to the City Council on September 29, 2025, as reported? Did Flock send periodic usage or performance reports to the Department after January 1, 2024?

ANALYSIS Article 93's audit provision and the 2024 report's investigators audit cover searches by the Department's own users. The 29 agreements give each partner agency access to the data the Department collects through Flock, and section 11 of Article 93 governs which agencies are granted access. Nothing in the records produced reviews the searches those agencies, or any other organization, ran on the Department's cameras, and the City's message does not say whether such a review exists.

How the agency answered

Request	Sent	Due	Response	Text as filed
26-668	2026-09-29	2026-10-07	2026-10-15	text
26-669	2026-09-29	2026-10-07	2026-09-30	text

> RECORD The City denied request 26-669 with the certificate quoted below. It closed request 26-668 with the words "Your request has been granted in part and denied in part." and 79 files released on the portal at no charge: 12 records of the Department's own program, 29 interagency agreements and 38 files of other agencies' policies.
>
> RECORD The City's letter of September 30, 2026 on request 26-669 reads: "This letter serves as a certificate that the records you requested do not exist under the name given by you or by another name reasonably known to the City." MCL 15.235(5)(b) describes "A certificate that the public record does not exist under the name given by the requester or by another name reasonably known to the public body". The same letter sets out the two courses MCL 15.235(5)(d) names, a written appeal to the head of the public body or judicial review under section 10, and the notice of the right to attorneys' fees and damages that MCL 15.235(5)(e) requires.

What the City produced

On request 26-668, on the City's records portal on October 15, 2026, 79 files. 12 of them are the Department's own program records: the two 2023 order forms with Flock's agreement and an unsigned copy of the 8-camera form (scans), the two invoices (a scan), the 2025 pilot agreement and its DocuSign certificate, Article 93, the 90-day report, the camera map (an image), the Council's Performance Resolution and the City's right-of-way permit (scans), and the letter to the Michigan Department of Transportation (a Word file). 29 are interagency agreements, each produced as the partner agency's signed copy, one of them a Word file and one carrying the partner's policy behind it; 38 are other agencies' policy files, as PDF, Word and one legacy Word document converted to PDF for publication. Our public copies black out, in the Department's records, the names of the four investigators in the report's audit table (ranks kept), incident and case numbers, the license plate in the report's example alert and a partly legible plate in a vendor photo, the name of an outside deputy, the names of a Sergeant, a Public Works Supervisor and three Public Works Crew Leads on the resolution, the direct lines and named mailboxes of the Chief, a Captain and the billing contact, the applicant's direct phone number on the permit, Flock employees' names and contact details, the DocuSign envelope identifier and IP addresses, and the address of a planner link on the invoices; the Chief's, the Deputy Chief's, the City Manager's and the Director of Public Works' names, the partner agencies' signers and the name of Flock's General Counsel (an officer of the company) stay as printed, and every file's document properties are cleared. No system export was produced on either request.

Documents

Public copies of the records this page relies on. Each file lists the request it came from, the date received, and the first 16 characters of its SHA-256 hash; the full hash is on the All files page.

Document	Request	Received	Pages	Redaction

What we sent

Our requests, as filed, with contact details omitted. Where a request was filed through a NextRequest portal, its number links to its page there. Some portals show that page only to the requester and the agency.

Document	Request	Sent	Pages
Our request 26-668, Part A (documents), as filed	26-668	2026-09-29	2
Our request 26-669, Part B (system exports), as filed	26-669	2026-09-29	2

Requests and responses

The record of each request: dates, fees and the agency's determination, as on the Requests page. "Agency's determination" is the agency's own answer. "Where it stands" is our coding of the request's status. Once we have checked the records produced against the request, it says whether they covered every item requested or some of them; while questions that could close the gaps are with the agency, it waits for the answers.

Request	26-668 · text as sent
Sent	2026-09-29; counted as received 2026-09-30
Response due	2026-10-07; the agency's notice of 2026-10-07 extended it to 2026-10-21
Answered	2026-10-15, 11 business days after receipt
